Fresco Collection

In Italian "affresco " means 'fresh'.

Fresco-secco / secco mural painting techniques is application on dried plaster to supplement painting in fresco.

The story of pigment is rooted in nature, for ages minerals are used to produce pigments & paints.

Traditionally extracted from rocks, soils and clays, the rich and warming colours produced speak volumes about the terrain from where they originate.

Soft, earthy hues made from ochre, sienna and umber are responsible for most of what we today identify as reds, golds and yellows, creams and browns.
